***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13 and 15, drawn to a plastid transformation vector comprising a first flanking sequence, a sequence encoding psbA, a 5' UTR, a sequence encoding HSA and a second flanking sequence.

Group II, claim(s) 14, drawn to a plastid transformation vector comprising a first flanking sequence, a plastid promoter, a sequence encoding a selectable marker, a sequence encoding HSA or a homolog thereof and a second flanking sequence.

Group III, claim(s) 16-20, drawn to HSA isolated from chloroplasts.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-III appears to be HSA isolated from chloroplasts.

However, Daniell (WO 01/72959) teach plastid transformation vectors encoding HSA and plants whose chloroplasts were transformed with the vector (pg 78-80; Fig 2-4 on figure pg 18 and Fig 9-10 on figure pg 20). Thus, claim 1 among others, is not novel.

Therefore, the technical feature linking Groups I-III is not special and the Groups are not so linked under PCR Rule 13.1.

**Applicant is advised that for the reply to this requirement to be complete, it must include (i) an election of an invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out the supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be present at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of the right petition under 37 CFR 1.144.

Should Applicant traverse on the ground that the inventions are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a refection under 35 U.S.C. 103(a) of the other invention(s).

If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne R. Kubelik, whose telephone number is (571) 272-0801. The examiner can normally be reached Monday through Friday, 8:30 am - 5:00 pm.
